Abstract (en)

[origin: WO2014108724A1] The invention relates to a display case having at least one translucent face provided with a securable opening, having:
• a presentation volume provided to house one or more objects to be presented in the display case; • a viewing face provided with at least one secured pivoting window having:
• a panel fixed to the display case in a pivoting manner by one of the sides of the panel by means of a pivoting side support; • a pivoting side rail fixed to the display case in a pivoting manner in the opposite region of the translucent panel with respect to the pivoting side support and having a housing in which the free edge of the panel is inserted when the panel is in the closed position; said panel being translucent.
