Abstract (en)

[origin: CA2896808A1] A multi-layer data carrier (1) in the form of a card and having a core layer (2) on a paper base is proposed, a personalization feature (5) being formed in said paper base. At least part of the surface of the data carrier (1) is shaped to form a relief (10) which has a viewing-angle-dependent optical effect and which extends through the cover layer (4) into the core layer (2).
