Abstract (en)

[origin: WO2014108227A1] The invention relates to an armrest (3) for a motor vehicle seat (1), said armrest (3) comprising: -a box structure (4) provided with a means for pivotal mounting (50, 90) on said seat, said means for pivotal mounting (50, 90) allowing said box structure to pivot about a pivot axis (X1), and -a movable element (7) separate from said box structure, said movable element being pivotally mounted on said box structure. According to the invention, said movable element has, as pivot axis, the pivot axis of said box structure.
