Abstract (en)

[origin: WO2014108235A1] A hydraulic anti-lock system (12) for a bicycle (10), the anti-lock system (12) comprising an inlet valve (36) for establishing and shutting off a hydraulic connection (42) between a brake actuation device (16) and a wheel brake (24); a pressure accumulator (40) for receiving brake fluid from the hydraulic connection (40) between the inlet valve (36) and the wheel brake (24); and an outlet valve (38) for connecting the pressure accumulator (40) to, and separating the pressure accumulator (40) from, the wheel brake (24). The pressure accumulator (40) is designed so as to feed brake fluid back into the hydraulic connection (42) between the inlet valve (36) and the wheel brake (24).
