Abstract (en)

[origin: WO2014108274A1] The invention relates to a peripheral seal for a window pane, particularly an insulating window pane, including at least a first (5) and a second (5) glass sheet that are combined together via at least one spacer (8) that keeps same at a certain distance from one another, and between said at least two glass sheets (5), at least one inner space (4) is closed by the peripheral seal (1, 101, 102) arranged on the periphery of the glass sheets, around said inner space (4). According to the invention, the cross-section of the seal (1, 101, 102) includes a median portion and first (1011, 1021) and second (1012, 1022) end portions respectively secured to the first and second glass sheets (5). According to the invention, the cross-section of the seal (1, 101, 102) forms at least one cavity (1013, 1023) facing at least one of the side surfaces (52) of the first and second glass sheets (5).
