Abstract (en)
[origin: WO2015114159A1] The invention relates to a fuel-injection metering device (7) for a motor vehicle, said device having a main body (10) comprising at least one through-hole and the main body (10) forming a valve seat (8) on its inner face (9). The valve seat is provided to interact with a valve body (5) in order to seal and open the through-hole, and the inner face (9) of the main body (10) is electrochemically machined. The invention also relates to a mould (22), a production method and a fuel injection nozzle (1).
