Abstract (en)
A shelf comprising a bottom (2), and a front stopper (5) connected with the bottom, wherein at least a surface layer of the bottom is made of a low friction material, the shelf thereby being arranged for gravity-feed use. The bottom comprises ribs (9) arranged side by side and extending in a front-rear direction of the shelf (1), each rib having side clamping portions, wherein the shelf comprises functional elements constituting at least one kind of functional element of a group of functional elements comprising partition walls (6), roller tracks (7), and pushers (8), each functional element having a mounting portion, wherein the bottom is arranged for receiving the mounting portion between two adjacent ribs, wherein side clamping portions of the adjacent ribs facing each other engage with the mounting portion.
