Abstract (en)
[origin: CA2890795A1] Disclosed is a floor-treating appliance as vacuum cleaners, with a facing the bottom cleaner head for receiving a driven brush roller with an overload protection, whereby on a shaft a drive pulley is rotatably mounted and the shaft has a rotationally fixed driven member to the brush roller, and the drive pulley via a torsion spring with a clutch disc is coupled that is axially displaceable on the shaft and coupled by entrainment in rotation with the shaft, and are formed on the drive disc ramps adjusted above a torque threshold the clutch plate with the corresponding ramps by relative rotation axially, and by the actuating movement via a corresponding switching element is a circuit arrangement, a safety shutdown controllable.
