Abstract (en)

[origin: EP2944467A1] Provided is a burr cutter capable of well removing burrs without damaging a surface of a gravure cylinder. A burr cutter (4) is provided which includes a body portion (4a) fixed to an engraving mechanism including an engraving needle configured to engrave a surface of a gravure cylinder (5) in a circular cylindrical shape; and a cutter portion (4d) fixed to the body portion (4a) and configured to remove burrs caused due to engraving by the engraving mechanism. A surface of the cutter portion (4d) facing the surface of the gravure cylinder (5) is substantially in a planar shape.
