Abstract (en)
[origin: EP2945352A1] A mobile terminal disclosed herein includes a main body having front and side surfaces, a window curved from the front surface toward the side surfaces on a top of the main body to define at least a part of the side surfaces, a touch sensor curved along a shape of the window on a rear surface of the window, a display curved along a shape of the touch sensor on a rear surface of the touch sensor, a frame provided on a rear surface of the display and having a shape corresponding to the display for support, a rear case covering a rear surface of the main body, and a decoration member located at a lower or upper end of the window, and having a main surface portion covering a part of the front surface of the main body, and curved portions each extending from the main surface portion to cover a part of each side surface of the main body.
