Abstract (en)

[origin: WO2014111259A1] The invention relates to a support system (1) for a fan filter device (20) of a fan filter system (30), having a base strap (2) for arranging the support system (1) on the body (40) of a user and having a securing system (3) on the base strap (2) for securing the fan filter device (20) in a first position (4) and in at least one second position (5) on the base strap (2). The second position (5) is different from the first position (4), and the securing system (3) has a guide element (6) which is secured to the base strap (3), said guide element (6) being designed to retain the fan filter device (20) in the different positions (4, 5). The securing system (3) has a counter-guide element (10) which is movably guided on the guide element (6) via at least one guide gap (11), and the counter guide element (10) has at least one securing element (12) for securing the counter-guide element (10) on the fan filter device (20). The invention further relates to a fan filter device (20) for a fan filter system (30) and to a fan filter system (30).
