Abstract (en)  
[origin: CA2898255A1] The present invention relates to a ship for recovering ocean waste. The invention aims to provide a means for recovering waste floating in the sea. Said aim is achieved by a ship (1) that recovers ocean waste, comprising at least two lateral hulls (2) which define a basin (3) therebetween. The ship according to the invention is characterised in that the basin (3) is open at the two ends thereof (6, 7) and comprises a plurality of consecutive sections (11, 12, 13) from the bow (6) to the stern (7) of the ship (1), each of which is provided with at least one collection device (21, 22, 23), the collection devices (21, 22, 23) of each section (11, 12, 13) being capable of collecting objects of different sizes, the sections (11, 12, 13) being arranged such that a device capable of collecting smaller objects is arranged behind a device capable of collecting larger objects.
