Abstract (en)

[origin: WO2014111639A1] The invention relates to amphiphilic derivatives of a triazamacrocyclic compound, as well as to said derivatives as active molecule transporters. The invention also relates to a nanodrug including at least one amphiphilic derivative of a triazamacrocyclic compound and at least one active molecule of a protein such as an antibody, in particular for the treatment of autoimmune diseases or for the treatment of cancer.
