Abstract (en)
[origin: WO2014111240A1] The invention relates to a sanitary fitting having at least one first actuating element (17), in particular for setting the temperature and/or volume of mixed water, and having at least one second actuating element (21) for setting the volume of hot water. According to the invention, in order to set the volume of hot water, a valve element (43), in particular a solenoid valve, which is electrically controllable by the second actuating element (21), is arranged in the hot water flow path.
