Abstract (en)
[origin: WO2014111219A1] The invention relates to a structural profile element having a first and a second profile, which each comprise an inner and outer profile limb each having an inner side and an outer side, and a profile web connecting the profile limbs to each other. At least one sound-damping and/or thermally insulating intermediate element is provided between the inner profile limb of the first profile and the inner profile limb of the second profile. The intermediate element rests on the inner sides of the two inner profile limbs.
