Abstract (en)

[origin: WO2014111200A2] The invention relates to a contact element (10; 10'; 10"; 10'') for providing an electrical contact to an electric machine, particularly in a motor vehicle, comprising: a first contact section (13; 14; 18; 21') formed from a first material; and a second contact section (11; 17'; 11; 23) formed from a second material that is different from the first material, wherein the first contact section and the second contact section are connected by means of a multi-component connection (16; 16'; 16"; 16'').
