Abstract (en)

[origin: CN204805507U] The utility model provides the utility model discloses a guiding device (200) of guide operation apparatus (210), it has traction frame support (220) as the connecting element, as traction frame (230) of traction element with as hook spare (240) of support component, this traction frame (230) link to each other with traction frame support (220), can move in the primary importance or the second place for traction frame support (220), and accessible traction frame support (220) links to each other with operation apparatus (210), this hook spare (240) link to each other with traction frame support (220) through deformable spring element (250) and keep in the primary importance through making traction frame (230) support on -hook piece (240) general's traction frames (230). Here, the aversion of spring element (250) accessible hook (240) and warping, and traction frame (230) can swing the second place after spring element (250) warp in.
