Abstract (en)

[origin: EP2947216A1] The invention relates to a floor construction using a floor part for an insulation floor for a floor for buildings, comprising a substantially block-shaped floor element of synthetic foam provided with a top and bottom face and opposing longitudinal sides, and wherein along the opposing longitudinal sides the floor element is provided with shape-retaining, substantially rectangular U-profile parts provided with a body and flanges, wherein the bodies abut the longitudinal sides, a flange abuts a top face, and a flange is embedded in the floor element spaced apart from the bottom face.
