Abstract (en)  
[origin: CN105089350A] The invention relates to a deadlock (1) for a door leaf (51) of a door (50), in particular to an all-glass door, including a housing (30), a dead bolt (10) and dead bolt mechanics (20) for moving the dead bolt (10) between an opened position, in which the dead bolt (10) is essentially disposed inside the housing (30), and at least one locking position (13), in which the dead bolt (10) is at least partially disposed outside the housing (30). Furthermore, the invention relates to a mounting method for an attaching disposition of a deadlock (1) in a centered or at least essentially centered manner at a long side (52) of a door leaf (51) of a door (50).
