Abstract (en)
[origin: WO2015176909A1] Disclosed is an inductor (1) for inductively heating tar sand, oil shale or very heavy oil deposits, said inductor (1) comprising at least one conductor (2) with at least one interruption point (4) at which two end regions (6) of the conductor (2) are connected using an electrically conducting connecting element (8, 9). The connecting element (8, 9) has a minimum resistivity of 10 Ωm and a maximum resistivity of 10 10 Ωm . The invention further relates to a method for producing said inductor (1).
