Abstract (en)  
[origin: EP2759222A1] The link (1) has a half-link (2) comprising a connection and locking element with a locking unit, and another half-link (3) comprising a complementary locking unit. The locking unit and/or the complementary locking unit are movable under action of an effort exerted according to direction (D) of strap and greater than a given value, against an elastic return unit. The return unit includes the complementary locking unit and/or the locking unit to authorize a change of relative position between the half-links according to the direction. Independent claims are also included for the following: (1) a strap (2) a watch.
