Abstract (en)
[origin: WO2014161727A1] The invention relates, among other things, to a vehicle (20), in particular a rail vehicle, comprising a gas-suctioning device (70) for suctioning gas (G) located in the vehicle (20). According to the invention, at least one segment of a suctioning line (80, 130, 140) of the gas-suctioning device (70) is fed through a luggage rack element (50) attached in the interior (10) of the vehicle (20), is retained on the luggage rack element, or is formed by the luggage rack element.
