Abstract (en)
[origin: WO2014115181A2] The present invention relates to a free standing body for trucks that it is essentially made up of a frame made of a series of metal load bearing profiles (2) that are shaped to house the special joining elements that allow them to be joined together and which are arranged to fit floor and curtain wall panels (6) to create a body or box that is secured to the cabin and bed of a vehicle once completed, thus creating the structure of the vehicle.
