Abstract (en)

[origin: WO2014117928A1] The invention relates to a retaining device (1) for arranging and/or fastening a curtain (2a), a screen (2b) or a curtain-like or screen-like material web (2) on a curtain carrier or screen carrier (3), in particular on a curtain rod (3a) or on a curtain rail or on a screen rod (3b) or on a screen rail, wherein the retaining device (1) can be arranged and/or is arranged and/or is formed at the upper end region of the curtain (2a), of the screen (2b) or of the material web (2), and wherein the retaining device (1) has a plurality of retaining elements (4). Curtains, screens or material webs are easily fitted in place and taken down in that the retaining elements (4) are designed and/or configured such that the retaining device (1) can be fitted on the curtain carrier or screen carrier (3) with the aid of the retaining elements (4).
