Abstract (en)
[origin: WO2014117908A1] The invention relates to a device (100) for extracting dried, pre-stored bodily fluid in a sample. Said device has a lab-on-a-chip system (10) comprising a receiving region (20), which is provided for receiving a sample (30) containing at least one bodily fluid in a dried, pre-stored form in a carrier material (40), and comprising a discharging region (50) for discharging the extracted bodily fluid from the sample (30). The dried, pre-stored bodily fluid is extracted from the sample (30) in the receiving region (20).
