Abstract (en)
[origin: CA2896384A1] The object of the invention is a motor vehicle door lock, comprising a locking mechanism, an actuating lever chain (12, 13, 14) and a drive (4, 5) for electrically opening the locking mechanism. According to the invention, an additional drive (7, 8) is provided, which optionally transfers the actuating lever chain (12, 13, 14) in its "locked" position and only then generates an opening signal for the drive (4, 5) for electrically opening the locking mechanism.
