Abstract (en)

[origin: CA2898790A1] The invention relates to a multi-link hinge (1) for furniture, with a fastening element (2) which can be secured indirectly or directly to a furniture body and is connected to a pivotable door bearing (4) via a plurality of link levers (5a-5d) connected to one another in a scissors-like manner, wherein a linear damper (6) which damps both a closing movement and an opening movement of the door bearing (4) is provided. The multi-link hinge (1) is distinguished in that the linear damper (6) is ineffective in a central portion of the pivoting range of the door bearing (4).
