Abstract (en)

The present invention relates to a flow-wrap pack (1) for wet wipes. The flow-wrap pack (1) has a film (3) defining a front wall (5) and a back wall (7), a longitudinal sealed seam in the form of a fin seal (9) and two transverse sealed seams (11) defining a product space. The fin seal (9) has an extended length and lies essentially flat against the back wall (7) of the wrap pack, thereby covering a scored tear line (13) and a resealable strip (15), said strip (15) extending between the transverse sealed seams (11) at an essentially right angle to the transverse sealed seams (11).
