Abstract (en)
[origin: EP2952637A2] A drain remediation tool (1) is provided comprising a housing (3) providing an aperture (15), a rotatable drum (5) at least partially disposed within the housing (3), a drive shaft (7) attached to the drum (5) and adapted to be attached to drive apparatus for rotation of the drum (5) and a plurality of teeth (9) attached to the drum (5) and protruding therefrom through the aperture (15) of the housing (3), which, on rotation of the drum (5), sequentially penetrate material in a drain causing agitation of the material and remediation of the drain. A method of drain remediation using the tool is also provided.
