Abstract (en)
[origin: EP2952822A1] [Object] Provided is an outdoor unit for an air-conditioning apparatus, which is compatible with a plurality of types of heat exchangers by mounting another component on the structure of a motor support member so as to share the motor support member among the plurality of types of heat exchangers. [Solution] The outdoor unit for an air-conditioning apparatus includes: a housing having an opening formed in a rear surface thereof and an air outlet formed in a front surface thereof; a heat exchanger (11) covering the opening of the rear surface of the housing from an inside of the housing; a fan motor support member (20) having an air-sending device fixed to a center portion thereof, a part of the fan motor support member above the air-sending device being locked onto an upper end side of the heat exchanger (11) and a part of the fan motor support member below the air-sending device being fixed onto a bottom panel of the housing; an inverted U-shaped locking plate (26) formed on an upper side of the fan motor support member (20), the inverted U-shaped locking plate (26) having a downward groove; and a size adjustment section (30) to be fitted into the downward groove of the inverted U-shaped locking plate (26) in accordance with a height and a thickness of the heat exchanger (11) so that the heat exchanger (11) is fitted into the downward groove of the inverted U-shaped locking plate (26) through intermediation of the size adjustment section (30).
