Abstract (en)
[origin: CN105186292A] The invention discloses a method for manufacturing a spark plug of an internal combustion engine and a spark plug of an internal combustion engine. Spark plug (1) contains a header (8) of the main body (2) and head region (8) to be assigned to the internal combustion engine combustion chamber. And, at least at least partially coating formed through the following steps to set on the head region (8) : - the header area (8) at least part of the roughness, and the slurry coating to the roughness of the head region (8), - dry coating slurry, heat - coated to the roughness of the head region (8) the slurry to form a porcelain glaze layer (10). The invention also relates to especially flux produced by the method of the internal combustion engine spark plug (1).
