Abstract (en)
[origin: WO2014121797A1] An ornamental component (1860) for a bracelet and / or a necklace is disclosed. The ornamental component have a through hole (1850) allowing the ornamental component to be strung on an elongated member of a bracelet and / or necklace, said through hole defining a through hole axis. The ornamental component comprising : a self-supporting housing (1801) having a through hole comprising a first opening (1802) at a first side of the housing and a second opening (1806) at a second side of the housing; and a first tubular element (1805) having a through hole inserted in said through hole of said self-supporting housing through said first opening of said self-supporting housing. The ornamental component further comprises a locking element having a through hole inserted in the through hole of self-supporting housing through said second opening of the self-supporting housing. The locking element comprises an engagement portion attached to said first tubular element.
