Abstract (en)

[origin: WO2014121932A1] The invention relates to a device for producing colloidal fluids, comprising a colloidation container (1). The container is designed such that the total speed difference of a rotating fluid and the circumferential speed of at least one colloidation rotor (3) in a colloidation region (2) of the colloidation container (1) can be adjusted and/or does not equal more than 10% during operation.
