Abstract (en)  
[origin: US2014217054A1] A bottle includes a base, a neck, and a body extending axially between the base and the neck, and including at least one radially outwardly facing first surface, a radially outwardly facing second surface radially smaller than the first surface, a radially outwardly facing third surface radially larger than the second surface and established collectively by radially outwardly facing projection surfaces of a plurality of projections that project radially outwardly from the third surface. A label may be carried by the body over at least a portion of the third surface. Axial and circumferential space may be established between the label and the second surface.
