Abstract (en)

[origin: WO2014122389A1] The invention concerns a system (3) for supercharging the intake gases and for recirculating the exhaust gases of an engine (1), comprising: a supercharging circuit (5) comprising a turbocharger (9) to be driven by the exhaust gases from at least a first cylinder (2a, 2b, 2c) of the engine (1); a recirculating circuit (7) for the exhaust gases from at least a second cylinder (2d); and an exhaust gas-orienting device (25) which is connected to the two circuits (5 and 7) and is intended to be connected to an exhaust line (23) of the engine (1) so as to control an amount of exhaust gas placed in communication between the supercharging circuit (5), the recirculating circuit (7) and the exhaust line (23) of the engine (1).
