Abstract (en)
[origin: EP2778817A1] The first condition data of first equipment (1) is detected by sensor (3). The additional condition data of additional equipment (11) of additional technical plant (12) is recorded by additional sensor (13). The first condition data and additional condition data are transmitted to a sorting unit (4). The first condition data and the additional condition data are processed into a ranking list by the sorting unit. Independent claims are included for the following: (1) sorting unit; (2) system for monitoring first equipment of first technical plant; and (3) computer program stored in computer program product for monitoring first equipment of first technical plant.
