Abstract (en)  
[origin: JP2016000657A] PROBLEM TO BE SOLVED: To provide a semi-automatic cross-wound package manufacturing textile machine which is advantageous in a cost respect, has high performance and, moreover, optimizes operator's support and provides high flexibility. SOLUTION: A semi-automatic cross-wound package manufacturing textile machine includes a plurality of operation parts having a winding device for manufacturing a cross-wound package which is rotatably retained to a package frame and an operation part control device. Therein, the cross-wound package manufacturing textile machine has display means which is assigned to the operation parts and displays fiber parties manufactured on the operation parts.
