Abstract (en)
The invention relates to a envelope (7) for a cistern (3), the envelope (7) having a bag-like shape with a closable opening (8) and at least a first opening surrounded by an elastic zone (10) for passage of a downcome (5) and a second opening surrounded by an elastic zone (11) for passage of control means. The invention further relates to a combination of a cistern (3) having a reservoir, a downcome (5) and an access opening (4) for cistern control means, of a frame (2) arranged around the cistern (3) for supporting said cistern and of a envelope (7) according to the invention arranged around the cistern, wherein the first opening (10) is stretched around the downcome (5) and wherein the second opening (11) of the envelope (7) is stretched around the access opening (4).
