Abstract (en)
A sash (1) comprising: - a transparent element (2), preferably of a planar shape, having an inner face (21) and an outer face (22); - a weight-bearing frame (3), preferably in wood, suitable to support the transparent element (10) and lock it engaging the inner face (21); - a cover frame (4), preferably in aluminium, fitted on the weight-bearing frame (3), suitable to protect the latter on the outer side; - a plurality of locking elements (5) attached to the weight-bearing frame (3) and supporting the cover frame (4) ; wherein the cover frame (4) comprises upright elements (41) and transversal elements (42) suitable to reciprocally engage at the angle between the upright element (41) and transversal element (42) identifying a slot (9) between them; wherein the upright element (41) comprises a cover layer (410) overlying the slot (9).
