Abstract (en)

The process for the production of grids (1) for hobs, cookers and gas stoves comprising: a step of making a perimeter frame (2) which can be positioned on a hob; a step of preparing at least a laminar element (3) of elongated conformation; a step of shaping of the laminar element (3) to obtain a shaped laminar element (5) having a cross section of predefined shape; a step of cutting of the shaped laminar element (5) to obtain a support element (6, 6'); a step of fixing the support element (6, 6') to the perimeter frame (2), to define a hold intended to support pans, pots or the like above the burners of the hob.
