Abstract (en)

[origin: WO2014125158A1] The invention relates to a method and an apparatus for imaging arthropods. In the method an arthropod is detected. The arthropod may be illuminated when necessary. The method further comprises providing at least a first view to at least a part of the arthropod, providing a second view to the arthropod, and capturing at least one image of at least the first view and a second view of the arthropod. The apparatus comprises means for detecting an arthropod; means for providing a first view to at least a part of the arthropod and means for capturing an image of at least the first view and a second view of the arthropod.
