Abstract (en)

[origin: WO2014187794A1] The invention relates to a construction kit for a rail vehicle, which comprises at least one bodyshell (1) of a body of the rail vehicle, at least one door for the rail vehicle and at least one first window for the rail vehicle, which bodyshell (1) has a first door field (2) for fitting the door, which door field is delimited by two adjacent door columns (4) of the bodyshell, wherein the construction kit comprises a frame (6) to be fitted into the first door field (2), which can be detachably connected to the bodyshell (1) and which has at least one window bar (7), which, in conjunction with the door columns (4), delimits a first window field (3) for fitting the first window in the fitted state of the frame (6) in the first door field (2).
