Abstract (en)
[origin: WO2014124735A1] A portion capsule having a capsule cover and a capsule base, in a delivery state, is closed all the way round and contains a particulate beverage substance which can be dissolved or suspended by means of water. A distributor device (10) is arranged between the capsule cover and the beverage substance, said distributor device having a substantially circular distributor surface (12) with a centre and a radius R and being provided with through-openings (18, 19) for water. Up to four inner through-openings (18) for water are provided at a distance a from the centre of the distributor surface (12) and two to six outer through-openings (19) for water are provided at a distance b from the centre, where $0.21 R \leq a \leq 0.49 R$ and $0.65 R \leq b \leq 0.92 R$.
