Abstract (en)

[origin: WO2014125367A1] A foamable composition comprising: a foam precursor; from 40 to 98 % by weight, based on the total fibre weight, first fibres, defined as those fibres having a length less than 150µm; and from 2 to 60 % by weight, based on the total fibre weight, second fibres, defined as those fibres having a length of at least 150µm; wherein at least 50 % of the first fibres by weight are discontinuous man- made vitreous fibres, and wherein at least 60 % of the first fibres by weight have a length less than 65µm and at least 30% of the second fibres by weight have a length of at least 250µm.
