Abstract (en)  
[origin: WO2015103079A1] A preassembled display system is assembled at a first location by attaching a plurality of display panels to a frame (502). The preassembled display system is loaded onto a transportation vehicle (504). Next, the preassembled display system is moved to a second location in a transportation vehicle (506). The display unit is installed at the second location by attaching the preassembled display system to a mounting unit (508). A receiver box for providing media to display at the plurality of display panels is attached (510). The attaching of the receiver box may be performed at the first location and/or at the second location. The plurality of display panels are electrically connected to the receiver box (512). Again, the electrically connecting may be performed at the first location and/or at the second location.
