Abstract (en)  
An adjustment apparatus for adjusting the position of a diamond in a cutting machine, the diamond comprising a cutting face and the apparatus comprising a position sensor for determining the position of the diamond cutting face and a device arranged to adjust the position of the diamond. The position sensor is arranged to communicate the position of the diamond cutting face to the device and the device is arranged to adjust the position of the diamond by a predetermined amount in response to the communication from the position sensor.
