Abstract (en)

[origin: WO2014128143A2] The invention relates to a fire-fighting device (2) for rail vehicles, comprising a container (4) for the extinguishing fluid provided with an outlet (6) which can be connected to a pipe system (10) and which can discharge the extinguishing fluid (4a) stored in the container (4) for the extinguishing fluid. Said fire-fighting device can have a particularly flexible structure such that the container (4) for the extinguishing fluid is made of a plastic composite material.
