Abstract (en)

[origin: WO2014127887A1] The invention relates to a can closure (1) which is inserted into a can lid (2) of a can, in particular a beverage can, comprising an outer closure part (4, 5, 6) which is located outside of the can in the assembled state and which is inserted into a can opening in the can lid (2). The can closure also comprises an inner closure part (3) which is joined together with the outer closure part (4, 5, 6) in the assembled state and which is supported against the can lid (2) from below and is located within the can.
