Abstract (en)
[origin: WO2014128552A2] The invention relates to a dispenser (1), especially for edible pills, comprising a housing (2) in which a chamber is provided for accommodating a plurality of pills, wherein a pushbutton (3) is arranged on the housing (2), said pushbutton being pretensioned via at least one spring (31) to a starting position, and an output opening (4) arranged in the housing (2) which can be closed via a closure element (10), wherein the closure element (10) is pivotable by pressing the pushbutton (4) in order to release the output opening (4) at least in part. A pill can thus be discharged from the dispenser in a simple manner by actuating the pushbutton (3).
