Abstract (en)

[origin: WO2014006430A2] An electrical power generator that consists of a chain belt (2). The pressurized air that creates buoyant forces goes through an air circuit (23). The chain belt gives motion to two sprockets (3),(1). Through the bottom sprocket (1) kinetic energy that through a gearbox (21) is transferred to a generator (22) that converts kinetic energy to electrical power.
